Skills

Programming	Go, C++, Java, Kotlin, Bash, Python, Groovy
Security	HSM (Hardware Security Module), openSSL
Monitoring	Splunk, Prometheus, Grafana, Datadog
Databases/Caches	Postgres, Couchbase, MongoDB, Oracle, MySQL, Redis, Consul
Generic	Docker, Jenkins, Git, Kubernetes, Kafka, Pubsub, SQS, Debezium, MQTT, Jaeger, Protobuf/GRPC, Helm, Terraform, ArgoCD
Languages	Portuguese, Italian, English, French

Experience

EFG - Watch

SENIOR SOFTWARE ENGINEER

Italy - Remote

June 2023 - Now

- Bootstrapped the new Faceit Watch platform from scratch.
- Drove key initiatives and served as the main point of contact for all stakeholders.
- Designed, implemented, and maintained multiple Go microservices on Kubernetes.
- Streamlined CDC adoption using MongoDB, Debezium and Pubsub.
- Influenced strategic and architectural decisions.

NYDIG - Payments

SENIOR SOFTWARE ENGINEER

Italy - Remote

May 2022 - June 2023

- Developed middleware for gRPC-based component testing in microservices.
- Implemented a CDC system using Postgres, Debezium, and Pubsub.
- Redesigned and implemented platform/APP authentication systems (FIDO2, OAuth2, OpenID Connect, Passkeys).
- Maintained and evolved an internal ledger system for platform exchange.
- Designed, implemented, and maintained multiple Go microservices on Kubernetes.

Beat - Matching

SENIOR SOFTWARE ENGINEER

France - Remote

Sept. 2021- May 2022

- Redesigned the core-matching microservice model and implementation.
- Collaborated with the Machine Learning team to generalize the ranking system in driver-search operations.
- Designed, implemented, and maintained multiple Go microservices on Kubernetes.

Amadeus - Payments

TEAM LEAD/PRODUCT OWNER

Sophia-Antipolis, France

May. 2020 - Sept. 2021

- Defined strategy and backlog for a team of seven engineers in the security area.
- Led key initiatives and acted as the primary liaison for all stakeholders.

Amadeus - Payments

SOFTWARE ENGINEER

Sophia-Antipolis, France

Feb. 2019 - May. 2020

- Designed, implemented, and maintained payment security applications within PCI-DSS standards.
- Maintained and developed application hosting services for cryptographic operations using HSMs.
- Automated CI/CD pipelines using Jenkins in a containerized environment (Docker).

UniCredit - Financial risk

SOFTWARE ENGINEER

Milan, Italy

May. 2015 - Feb. 2019

- Designed, implemented, maintained, and operated applications for bank counterparty credit risk computation.
- Optimized resource usage using multiprocessing/multithread techniques.
- Built tooling for result analysis and troubleshooting.
- Collaborated with clients to generate requirements and manage the full application lifecycle.

Pattents, Certifications & Scholarships

Amadeus

Sophia Antipolis

CO-AUTHORED PATENT FOR DISTRIBUTED TOKENIZATION ENGINE

2019-2020

- Tokenized data security

Oracle Certified Professional

JAVA SE 8 CERTIFICATION

- Exam outcome: (90/100)

Milan

Jan 2018

Oracle Certified Associate

JAVA SE 8 CERTIFICATION

- Exam outcome: (97/100)

Milan

Dec 2017

Academic excellence scholarship

DOUBLE DEGREE PROGRAM

- Scholarship for double-degree program worth € 20,000

Milan - São Paulo

Jul. 2012 - Dec. 2014

Education

Politecnico di Milano

MSC MATHEMATICAL ENGINEERING - EMPHASIS ON SCIENCE COMPUTING

Milan, Italy

Set 2012 - Dec 2014

Escola Politécnica da Universidade de São Paulo

MSC MECHANIC ENGINEERING

São Paulo, Brazil

Jan 2008 - Dec 2014

Hobbies

- Outdoors sports, surf, guitar
