Skills

Programming	Go, C++, Java, Kotlin, Bash, Python, Groovy
Security	HSM (Hardware Security Module), openSSL
Monitoring	Splunk, Prometheus, Grafana, Datadog
Databases/Caches	Postgres, Couchbase, MongoDB, Oracle, MySQL, Redis, Consul
Generic	Docker, Jenkins, Git, Kubernetes, Kafka, Pubsub, Debezium, MQTT (HiveMq), Jaeger, Protobuf/GRPC, Helm, Terraform, ArgoCD
Languages	Portuguese, Italian, English, French

Experience

NYDIG - Payments

Italy - Remote

SENIOR SOFTWARE ENGINEER

May. 2022 - Now

- Creation of middleware to facilitate gRPC-based component testing in all microservices.
- Implement a new CDC (change data capture) based on Postgres, Debezium, Pubsub stack.
- Redesign and implementation of the platform/APP authentication system.
- Showcase and push for adoption of AI-based tools in development lifecycle.
- Design, Implement, Maintain and Operate several Go kubernetes-deployed microservices.

Beat - Matching

France - Remote

SENIOR SOFTWARE ENGINEER

Sept. 2021- May. 2022

- Redesign the model and the implementation of the core-matching microservice.
- Work along with Machine-learning team to generalize the ranking system in driver-search operations.
- Present in company-wide engineering conferences.
- Design, Implement, Maintain and Operate several Go kubernetes-deployed microservices.
- Create monitoring dashboards and alerts using mainly Prometheus and Grafana.
- Hydrate a hive-based data lake with audit data. Data used for BI and machine-learning models training.

Amadeus - Payments

Sophia-Antipolis, France

TEAM LEAD/PRODUCT OWNER

May. 2020 - Sept. 2021

- Define the strategy and the backlog for a team of 7 engineers under the security area.
- Present in company-wide engineering conferences.
- Collect requirements and prioritise product features development.
- Code-reviews and coaching.

Amadeus - Payments

Sophia-Antipolis, France

SOFTWARE ENGINEER

Feb. 2019 - May. 2020

- Design, Implement, Maintain payment security applications, especially within PCI-DSS standard scope.
- Maintain and develop application hosting services for cryptographic operations relying on HSMs.
- Automate CI/CD pipelines using Jenkins in a containerized environment (Docker).
- Create monitoring dashboards using Splunk, Prometheus, Grafana for application operability.

UniCredit - Financial risk

Milan, Italy

SOFTWARE ENGINEER

May. 2015 - Feb. 2019

- Design, Implement, Maintain and Operate applications responsible for bank counterparty credit risk computation.
- Optimize resources usage by leveraging on multiprocessing/multithread techniques.
- Build tooling for result analysis and troubleshooting.
- Work in the frontline with the client to generate/collect requirements and handle the full application life-cycle.

Undergraduate Research - Universidade de São Paulo

São Paulo, Brazil

RESEARCHER

Mar. 2011 - Sep. 2017

- Research in fluid mechanics field.

Certifications & Scholarships

Oracle Certified Professional

Milan

JAVA SE 8 CERTIFICATION

Jan 2018

- Exam outcome: (90/100)

Oracle Certified Associate

JAVA SE 8 CERTIFICATION

- Exam outcome: (97/100)

Milan

Dec 2017

Academic excellence scholarship

DOUBLE DEGREE PROGRAM

- Scholarship for double-degree program worth € 20,000

Milan - São Paulo

Jul. 2012 - Dec. 2014

Education

Politecnico di Milano

MSC MATHEMATICAL ENGINEERING - EMPHASIS ON SCIENCE COMPUTING

Milan, Italy

Set 2012 - Dec 2014

Escola Politécnica da Universidade de São Paulo

MSC MECHANIC ENGINEERING

São Paulo, Brazil

Jan 2008 - Dec 2014

Hobbies

- Outdoors sports, surf, guitar
